## Writing

Time: 20 min.

You are a member of School Discussion Club. For the next meeting you have been asked to prepare a speech offering your own ideas on computer games and the way they influence teenagers' behavior.

Write a short essay of about 90 - 100 words in an appropriate style.

**Remember** to structure your writing carefully:

- give an introduction (define the problem),
- express your personal view about potential hazards and educational value of computer games,
- come up with the ways of dealing with the problem.

Many people think that computer games influence teenagers' behavior. Others believe that it is good only in free time. Who is right?

In my opinion, computer games are good. Firstly, you can improve your IT skills. Secondly, you are communicating more ~~than~~ when you are playing. Some people have opposite opinion. They think that <sup>it</sup> take lots of your time. And it is true. You should not forget about your homework and ~~to~~ some ~~miss~~ missions.

Taking both of sides of opinion in consideration I cannot completely agree with these people. I think computer games aren't bad. Just you should not let ~~to~~ take them lots of your time.
